Reading.

2. Read the story about two friends and their camping trip and mark the sentences T (true) or F (false).

The Trip of Lifetime

This summer holiday, my friend Irvin and I wanted to do something different. Instead of wasting our time staying at home watching TV and playing computer games as usual, we decided to go camping.

After getting permission from our parents, we began planning our trip. We made a list of all the food and supplies we would need and spent an entire afternoon searching for the best place to buy our camping equipment. In the end, our tent, stove and sleeping bags cost a lot of money, but it was worth it.

When the day finally arrived, my Uncle Bob was kind enough to drive us to the campsite after he got off work. We knew it would take us a couple of hours to get there and Irvin and I grew more and more excited as we got closer to where we were going. It was dark by the time we arrived, but we didn't care. We waved happily at Uncle Bob as he drove away. Then, after a bit of trouble and a lot of laughter, Irvin and I set up the tent and lit the cooking stove. As we sat having our first meal at the camp – tinned spaghetti – we both agreed it was the best food we had ever eaten. A short time later, warm and comfortable in our sleeping bags, we quickly fell asleep and dreamed about what our great adventure would bring.

e.g. The boys were out of school when they came up with their plan. T

- 26. The boys normally spent their summer inside. _____
- 27. They asked their mothers and fathers to let them to go camping. _____
- 28. Their parents helped them plan what to buy. _____
- 29. It took the boys a long time to find the supplies they needed. _____

WHITE ROOFS FOR A BRIGHT FUTURE!

The effects of global warming are becoming more and more noticeable with the passing of the years. The number of floods, storms and heatwaves has increased as a result of carbon dioxide (CO₂) and other greenhouse gases that do not allow the sun's heat to escape the Earth's atmosphere. However, a simple and quite possibly effective idea has been suggested as a way to help lessen the consequences of climate change.

Professor Steven Chu, the US Energy Secretary and a Nobel Prize winner, suggests that painting our rooftops white will help the Earth's temperature to drop. The idea is that if enough surfaces – rooftops, pavements, roads – are painted white, more sunlight will reflect off these surfaces and go back into space. This will help cool our planet down.

According to scientists, if rooftops and roads were painted white it would reduce the amount of CO₂ by billions of tons. This would be the same as taking every car in the world off the streets for 11 years. Not only this, but homes with white rooftops and cars that are painted white wouldn't absorb so much heat from the sun. This means that they would be cooler and people wouldn't have to turn on their air conditioners as much. Consequently, we would save more energy and reduce the amount of CO₂ released in the atmosphere.

Although the idea of white rooftops has been generally welcomed by the scientific and environmental communities, there appear to be a few problems. One of these is the fact that the colour white would be too bright if it was painted on too many large surfaces. Another concern is that keeping the white surfaces in good condition for a long period of time would be too expensive.

Pessimists feel that though painting rooftops and pavements in light colours is good in theory, it is just a very small step to take towards reducing the Earth's temperature. What we must remember though, is that there is not *one* solution to global warming. It's the combination of different methods that will help our planet get back on its feet.
